The event, organized in cooperation with Business Sweden in Japan, created a great interest. About 60 representatives from leading research institutes, industrial users and partners were present. Among the attendance list can be mentioned Hitachi, KEK, Tokyo University, Toshiba and Mitsubishi.

The event program included presentations about ScandiNova in Japan as well as the company's history, current situation and business outlook. Ms. Cecilia Leiram, Trade Commissioner at Business Sweden, Japan held an appreciated presentation about the business relation between Japan and Sweden, and also highlighted that the countries this year celebrate 150 years of diplomatic relations!

Mr. Naohito Saito, Director, J-PARC Center, held a highly appreciated presentation from a customer perspective.

ScandiNova Systems K.K. President Mikael Lindholm comments "I am very honored by the great interest in our establishment in Japan, which is an important milestone for our company. I look forward to future collaboration with users of pulsed power systems in the Japanese market."

ScandiNova Systems K.K. CEO Osamu Yushiro comments ""

### **About ScandiNova**

Thanks to its breakthrough technology, ScandiNova is a world leader in the development and production of Pulsed Power Systems with high power levels. The company's product range covers pulse modulators, generators, turnkey radio frequency (RF) systems and e-gun modulators, all equipped with Solid State technology.

These systems have key functions in several research-based applications and radiotherapy, as well as in cargo inspection, non-destructive testing, industrial X-ray, sterilization and other industrial uses.

#### EXCELLENCE IN PULSED POWER

More than 95% of production is exported to clients in 40 countries, mainly in Europe, Asia and North America. ScandiNova Systems AB, a spin-off from Scanditronix, was founded in 2001 by individuals with long commercial and technical experience in pulsed-power applications. The company, which has its head-office in Uppsala, Sweden, has 65 employees plus sales representatives in key regions around the world.
